

PARVINDER SINGH GANDHI

FULL-STACK SOFTWARE ENGINEER

Indore, Madhya Pradesh, India | Mr.ParvinderSinghGandhi@gmail.com | +91 93011 82667
portfolio-parvinder.vercel.app | github.com/parvinder-singh-2 | linkedin.com/in/itzparvinder

SUMMARY

Software Engineer experienced in developing scalable full-stack web applications using React, FastAPI, PostgreSQL, and Docker. Built end-to-end software solutions, REST APIs, and responsive user interfaces while contributing to AI- and IoT-driven research projects. Published patent holder with experience in government-funded innovation initiatives, passionate about building production-ready software and solving real-world engineering challenges.

TECHNICAL SKILLS

Programming	Frontend	Backend	Tools	Databases
• Python • JavaScript • SQL • HTML/CSS	• React • Tailwind • Vite	• FastAPI • Rest API • JWT Auth • SQLAlchemy	• Git • Github • Docker • Vercel	• PostgreSQL • Supabase

PROFESSIONAL EXPERIENCE

Customer Interaction Specialist

TaskUs | Aug 2025 – Present

- Delivered customer support through chat and voice channels while maintaining high customer satisfaction and quality standards.
- Investigated and resolved complex order, payment, and account-related issues by collaborating with cross-functional teams.
- Consistently met productivity, quality, and compliance metrics in a high-volume support environment.

Content Moderator

Teleperformance | Nov 2023 – Jun 2025

- Reviewed and moderated high volumes of user-generated content in accordance with platform policies.
- Ensured policy compliance while maintaining strict quality and accuracy standards.
- Worked with internal quality teams to improve moderation consistency and reduce errors.

KYC Expert

Teleperformance | Nov 2021 – Apr 2023

- Verified customer identities and documentation while ensuring compliance with KYC regulations.
- Processed large volumes of verification requests with high accuracy and efficiency.
- Maintained confidentiality and adherence to regulatory procedures.

FEATURED PROJECTS

Mess Manager

React • FastAPI • PostgreSQL • Docker • JWT Authentication

Developed a full-stack tiffin management platform to streamline customer, meal, payment, and delivery operations for a growing food service business.

- Designed and developed a responsive React frontend with reusable components and role-based dashboards.
- Built secure REST APIs using FastAPI, PostgreSQL, and JWT authentication for customer, payment, and meal management.
- Implemented analytics dashboards featuring revenue tracking, delivery monitoring, and business insights.
- Containerized the backend using Docker and integrated cloud-hosted PostgreSQL for deployment.

Developer Portfolio

React • Tailwind CSS • Framer Motion

Designed and developed a modern, responsive portfolio website to showcase software engineering projects, research, patents, and technical achievements.

- Built reusable React components with clean architecture and responsive layouts.
- Implemented interactive animations and smooth transitions using Framer Motion.
- Optimized the website for performance, accessibility, and mobile responsiveness.
- Designed project showcase pages with dynamic layouts and modern UI/UX principles.

SPIDERS – Swarm Platform for Intelligent Defence & Exploration Robotics

Python • AI • Robotics • Computer Vision • IoT

Designed the software architecture for an AI-powered autonomous swarm of quadruped robots intended for battlefield reconnaissance, terrain exploration, and intelligent mine detection.

- Architected a modular swarm robotics system enabling autonomous coordination and mission planning.
- Proposed AI-based navigation, obstacle avoidance, and multi-agent communication workflows.
- Designed scalable software architecture integrating sensor fusion and autonomous decision-making.
- Prepared technical documentation and research supporting future prototype development.

Case Study and More:- <https://portfolio-parvinder.vercel.app/#projects>

EDUCATION

Bachelor of Technology (B.Tech.) – Electronics & Communication Engineering

SAGE University, Indore

2021 – 2025

ACHIVEMENTS

₹1,00,000 Government Proof of Concept Grant

- Awarded funding under the Bharat WIN initiative for developing an AI-powered urban flood and drainage monitoring system (DRAINX).

4 Published Patents

- Published four engineering patents in AI, robotics, and intelligent monitoring systems.

Government Innovation Selection

- Selected for the Jal Shakti innovation program for proposing technology-driven solutions in water resource management.

Research & Innovation

- Designed AI and IoT-based systems addressing real-world challenges in defence and smart infrastructure.
